

How to connect your Windows PC with internet?

Go to windows settings options

image-1594977089051.png

Go to 'network and Internet' in the settings

image-1594977148603.png

Or click the network icon in the bottom right corner notification bar. And then click the Network and Internet security.

image-1594977319388.png

Then Click on the 'show available network options'. The available networks will pop-up from the network icon. Click the network you want to connect with, then tick the option 'connect automatically' to connect whenever the network is available.

image-1594977345763.png

Then click the connect option, then enter the password (or the security key) and click next to complete the connection setup.
