How to use privacy dashboard for your account security?

Microsoft provides a privacy dashboard common for an account regardless of a number of devices.

To access privacy dashboard go to : https://account.microsoft.com/account/privacy

Sign-in to access your account.

In this page, you can manage things from your browsing data to location privacy settings. Moreover, scrolling down shows you options to manage privacy settings for various Microsoft applications.

Within the Windows app, you can control many privacy options. To see these options go to, Setting-> Privacy.

Here for each option, you maintain your privacy by enabling or disabling app permissions (location, camera, microphone etc.) which can be accessed through the options shown in the left pane.
