Instagram- How to keep activity status turned OFF?

1. On your account profile, tap image not found or type unknown at the top right (for android) to see settings option.
2. Tap image not found or type unknown **Settings** at the bottom of the page then go to > **Privacy** and then > **Activity Status**.
3. Tap the slide switch image not found or type unknown (if it's ON) next to **Show Activity Status**.

This will turn off your activity status.

Note: Instagram also notifies you, if you turned off you won't be able to see others activity status as well. Make changes according to your preferences and interests.
