

Instagram: How to keep Your account private?

In the app version on the mobile device , Android or IOS

1. In your account profile, tap  to open Settings.
2. In the option  **Settings at the bottom left**, Tap to see privacy options.
3. Locate and tap the Account Privacy in Privacy settings

Privacy > Account Privacy.

This makes your account private. By making your account private, your profile contents and other information are not visible to the public.
